## **DETAILED ACTION**

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 8,9,19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 is indefinite because it recites "a first solid" without any correlation to "at least one solid" previously recited in claim 1. Claim 19 is indefinite because it recites "a first solid" without any correlation to "at least one solid" previously recited in claim 10. Claims 9 and 20 are indefinite because they depend from the above indefinite claims.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-5,7-15 and 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the mercury removal process of Audeh (4,877,515), wherein an alkali polysulfide is placed on a porous carrier material and then used to remove such mercury.
- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 10/662,897

Art Unit: 1724

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 6. Claims 6 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Audeh (4,877,515) in view of Chao (4,474,896). The claims differ from the disclosure of Audeh ('515) in the porous support material being selected from the group of "pumice, clay, activated carbon, and a mixture of at least two of these materials". Chao ('896), at col. 4, lines 3-11, shows that a porous support material for an alkali polysulfide can include carbons, activated carbons, ion-exchange resins, diatomaceous earth (clay), metal oxides, silicas, aluminas, aluminosilicates (zeolites) and the like. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to use a porous support material such as activated carbon or clay as the support material of Audeh ('515) in place of the zeolite, in view of the showing of Chao ('896) of the alternativeness of these porous support materials.
- 7. The remaining references listed on the PTO-892 show art of interest.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
